

# KENDRIYA VIDYALAYA NO:2

AIR FORCE STATION LOHEGAON, PUNE-32

CLASS: XII COMPUTER SCIENCE PROJECT

SESSION:2022-2023

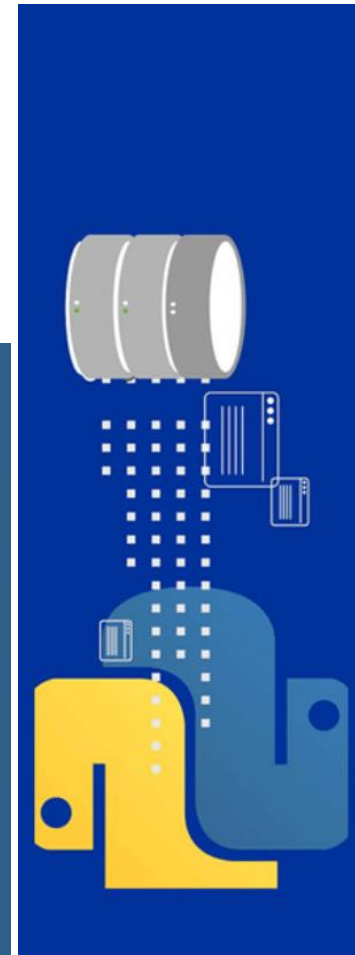

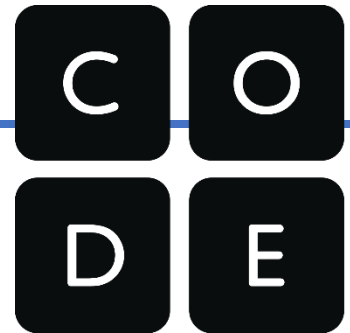

## PHARMACEUTICAL COMPANY MANAGEMENT

A PROJECT BY : MA HARSH KADAM

CLASS: XII A

# COMPUTER SCIENCE

# **CERTIFICATE**

This to certify that HARSH KADAM of class  
XII A has successfully completed the  
Computer Science project on topic  
“**PHARMACEUTICAL COMPANY MANAGEMENT**”  
under guidance of Mrs. Shraddha Joshi during  
year 2022-2023. I certify that this project is up  
to my expectations and as per the guidelines  
issued by CBSE.

**Internal  
examiner**

**External  
examiner**

**Principal**

## **ACKNOWLEDGEMENT**

I would like to express my special thanks of gratitude to my teacher Mrs .Shraddha Joshi as well as our principal Mrs. SHINY GEORGE who supported me to do this wonderful project on the topic“ PHARMACEUTICAL COMPANY MANAGEMENT”, which also helped me in doing a lot of Research and I came to know about so many new things I am really thankful to them.

I take this opportunity to express my deep sense of gratitude for his invaluable guidance, constant encouragement, immense motivation, which has sustained my efforts at all the stages of this project work.

# **INDEX**

- Overview of Python and SQL
- Objective
- Source Code used in project
- Output of the project
- Bibliography

# **1. OVERVIEW OF PYTHON AND SQL**

## **1.1. PYTHON**

- Python is a high-level, interpreted, interactive and object-oriented scripting language. Python is designed to be highly readable. It uses English keywords frequently where as other languages use punctuation, and it has fewer syntactical constructions than other languages.
- **Python is Interpreted** – Python is processed at runtime by the interpreter. You do not need to compile your program before executing it. This is similar to PERL and PHP.
- **Python is Interactive** – You can actually sit at a Python prompt and interact with the interpreter directly to write your programs.
- **Python is Object-Oriented** – Python supports Object-Oriented style or technique of programming that encapsulates code within objects.
- **Python is a Beginner's Language** – Python is a great language for the beginnerlevel programmers and supports the development of a wide range of applications from simple text processing to WWW browsers to games.

## **1.2. SQL**

SQL is Structured Query Language, which is a computer language for storing, manipulating and retrieving data stored in a relational database.

### **Advantages of SQL**

- Allows users to access data in the relational database management systems.
- Allows users to describe the data.
- Allows users to define the data in a database and manipulate that data.
- Allows to embed within other languages using SQL modules, libraries & pre-compilers.
- Allows users to create and drop databases and tables.
- Allows users to create view, stored procedure, functions in a database.
- Allows users to set permissions on tables, procedures and views.

# OBJECTIVE OF THE PROJECT

The main objective of the project is to manage A

Pharmaceutical Company. The project is aimed to manage

the A company details , **Medical Store Details ,Workers**

**Details , Product Details also Stock cheaking and Placing**

**Order**. It focusses to build an application program to reduce

the manual work of managing the Company
